HOMECARE BEDS

The PLEGA Homecare bed places you in total control of your sleeping position. At the touch of a button you can lift, recline, and smoothly adjust to your most comfortable position. There are no set positions. You are free to contour the bed to a precise angle, imagining the bed as an extension of your body. A malleable and curving support that adapts to individual pressure points and problem areas.

Dual Sets

Both you and your partner can enjoy the benefits of a PLEGA bed without having to compromise your individual sleep preference.

Australian Made

All of our beds are made at the PLEGA Healthcare Centre in Melbourne. Here we have the ability to enforce high quality assurance standards and provide customers with local service and support.

Dress to impress

A bed that benefits your health does not have to look like a hospital bed. Our beds are designed fit in with your bedroom environment and can be dressed in anyway you like, including inside bed surrounds.

FULL HOMECARE BED DIMENSIONS

L x W x H (Including Mattress) cm

Latex	20cm	Standard	35cm

HEAD ELEVATION

Elevation of the back of the bed can aid heart and lung conditions, hiatus hernias as well as neck, shoulder and upper back pain.

LEG LIFT

Adjusting the foot of the bed with its knee break lift section provides relief to lower back and hip pain, varicose veins, fluid retention and cramps.

EASY TO OPERATE

The various contoured positions are great for circulatory assistance and release of pressure points around the shoulders, hips, knees and heels.
